CONTENTS OF VOLUME XIX.

NUMBER LV.

Page.

Art. I. Account of some Volcanic Springs in the Desert of the Colorado, in Southern California; by John L. LeConte, M.D., 1

II. On the Geographical Distribution of Crustacea; by James D. Dana, - - - - - - - - - - - - 6

III. Contributions to Mineralogy; by Dr. F. A. Genth, - - 15

IV. On the Diamagnetic Force; by Prof. Tyndall, - - 24

V. Reply to some remarks by W. H. Wenham, and Notice of a new locality of a Microscopic Test-object; by Professor J. W. Bailey, - - - - - - - - - - 28

VI. On the bearing of the Barometrical and Hygrometical Observations at Hobarton and the Cape of Good Hope on the general theory of the Variations of Atmospherical Phenomena; by Professor Dove, - - - - - - - - 31

VII. On the Composition of Eggs in the the series of Animals—Part I. By A. Valenciennes and Fremy, - - - 38

VIII. The Arabic or Indian Method of Notation; by Thomas H. McLeod, - - - - - - - - - - - - 48

IX. On the Effect of the Pressure of the Atmosphere on the Mean Level of the Ocean; by Captain Sir James Clark Ross, R.N., F.R.S., - - - - - - - - - 52

X. Report to the Academy of Sciences, Paris, on the Researches relative to Earthquakes of M. Alexis Perrey; by the Commission, MM. Liouville, Lamé, and Elie de Beaumont, 55

XI. On the Periodical Rise and Fall of the Lakes; by Major Lachlan, - - - - - - - - - - - - 60

XII. Synopsis of the Ichthyological Fauna of the Pacific slope of North America, chiefly from the collections made by the U. S. Expl. Exped. under the command of Capt. C. Wilkes, with recent Additions and Comparisons with Eastern types; by L. Agassiz, - - - - - - - - - - - 71

XIII. Thoughts on Solution and the Chemical Process; by T. S. Hunt, - - - - - - - - - - - 100

XIV. Correspondence of M. Jerome Nicklès—Obituary; M. Brisseau de Mirbel, 103.—Astronomical Refraction: Constitution of the Sun; Solar Magnetism, 104.—Optics—Manufacture of Glass for Objectives: Polarization of the Atmosphere, &c.: Microscopes for Micrographic demonstrations, by Nachet, 105.—Aluminium and the Alkaline Metals, 106.—Manufacture of Alcohol: Crystallizations, 107.—Introdution into France of a new species of Silkworm: Industry, Agriculture, and Productions of Algeria, 108.

SCIENTIFIC INTELLIGENCE.

Chemistry and Physics.—On the influence of the direction of transmission upon the passage of radiant heat through crystals, 110.—On the condensation of gases by solid bodies, and on the heat disengaged in the act of absorption, 111.—Researches on the Ethers, 112.—On the cyanic and cyanuric ethers and on the amids, 113.—On some new Ethers: Action of the protosalts of iron on Nitronaphtalin and Nitrobenzin, 114.—Prof. Tyndall on some Peculiarities of the Magnetic Field, 115.

Mineralogy and Geology.—Analysis of Allophane from the Black oxyd of Copper mines of Polk County, Tennessee, by Dr. C. T. Jackson: On the Boracic Acid Compounds of the Tuscan Lagoons, by Emil Bechi, 119.—On the Thickness of the Ice of the Ancient Glaciers of North Wales, and other Points bearing on the Glaciation of the Country, by Prof. Ramsay, 121.—On the Foliation of some Metamorphic Rocks in Scotland, by Prof. E. Forbes, 122.—On the Relations of the "New Red Sandstone" of the Connecticut Valley and the Coal-bearing rocks of Eastern Virginia and North Carolina, by Prof. W. B. Rogers, 123.—Note on an indication of depth of Primeval Seas, afforded by the remains of color in Fossil Testacea, by Edward Forbes, F.R.S., 126.—Arsenate of Lead and Vanadate of Lead: On the Identity of Ripidolite of von Kobell with Clinochlore, by N. von Kokscharov, 127

Botany and Zoology.—Martius Flora Brasiliensis, fasc. XII: The non-assimilation of Nitrogen by Plants: Lupulin: The Fertilization of Ferns, 128.—Botanical Necrology: Payer; Traité d'Organogénie Végétale Comparée, 129.—The Micrographic Dictionary, by Griffith and Henfrey: The Individual in Plants, etc.: On the Influence of the Solar Radiations on the Vital Powers of Plants growing under different Atmospheric Conditions, by J. H. Gladstone, 130.—Note on the Mastodon (?), and the Elephas primigenius, by Sir John Richardson, 131.—Remains of the Mammoth and Mastodon in California, by W. P. Blake: Discovery of Viviparous Fish in Louisiana, by B. Dowler, M.D., with remarks by Prof. Agassiz, 133.—Perforating Animals, 136.—Mollusca of Irkutsk, 137.

Astronomy.—Elements of Urania: Comet, 1854, IV: New Planets, 137.

Miscellaneous Intelligence.—On the Means of Realizing the Advantages of the Air-Engine, by William John Macquorn Rankine, F.R.S.S., etc., 137.—On Lightning Conductors, 139.—On the Effect of Pressure on the Temperature of Fusion of different Substances, by Mr. Hopkins, 140.—M. Foucault's nouvelles expériences sur le mouvement de la terre au moyen du Gyroscope, 141.—On Meteorolites and Asteroids, by R. P. Greg, Jr., 143.—Summary of the Weather for June, at San Francisco, California; by H. Gibbons, M.D., 144.—Observations on Atmospheric pressure; from A. and H. Schlagintweit's "Untersuchungen über die physicalische Geographie und die Geologie der

Alpen," 145.—On the Artificial preparation of Sea Water for Marine Vivaria, by Dr. G. Wilson: On the Results of Experiments on the Preservation of Fresh Meat, by Mr. G. Hamilton, 146.—Magnetic Needle: Official Report of the United States Expedition to explore the Dead Sea and the River Jordan, by Lieut. W. F. Lynch, U. S. N., 147.—Illustrations of the Birds of California, Texas, Oregon, British and Russian America, by John Cassin, 149.—Orr's Circle of the Sciences—Crystallography and Mineralogy, by Rev. Walter Mitchell, M.A., and Prof. Tennant: Edinburgh New Philosophical Journal: Memoria sobre las Antigüedades Neo-granadinas, por Ezequiel Uricoechea, 150.—Denkschriften der Kaiserlichen Akademie der Wissenschaften, zu Wien: Economie Rurale, considérée dans ses rapports avec la Chimie, la Physique et la Météorologie, par J. B. Boussingault: Traité des Arts Ceramiques ou des Poteries, etc., par Alex. Brongniart, 2nd edit. revue et augmentée par M. A. Salvetat, 151.—Cours special sur l'Induction, le Diamagnétisme, le Magnétisme, etc., par M. Matteucci: Nouveau Système de Navigation, etc., par Planavergne, 152.

List of Works, 152.

NUMBER LVI.

Page.

Art. XV. Memoir on Meteorites—A Description of five new Meteoric Irons, with some theoretical considerations on the origin of Meteorites based on their Physical and Chemical characters; by Prof. J. Lawrence Smith, M.D., - - - 153

XVI. On the Periodical Rise and Fall of the Lakes; by Major Lachlan, - - - - - - - - - - - 164

XVII. On the Clinochlore of Achmatowsk; by N. von Kokscharov, - - - - - - - - - - - 176

XVIII. A brief notice of some facts connected with the Duck Town, Tennessee, Copper Mines; by M. Tuomey, - - 181

XIX. On the Periodical Variations of the Declination and Directive Force of the Magnetic Needle; by Prof. W. A. Norton, 183

XX. Observations on the Fructification of the Arachis hypogæa; by Hugh M. Neisler, - - - - - - 212

XXI. On certain Physical Properties of the Light of the Electric Spark, within certain Gases as seen through a Prism; by D. Alter, M.D., - - - - - - - - - - 213

XXII. Synopsis of the Ichthyological Fauna of the Pacific slope of North America, chiefly from the collections made by the U. S. Expl. Exped. under the command of Capt. C. Wilkes, with recent Additions and Comparisons with Eastern types; by L. Agassiz, - - - - - - - - - - 215

XXIII. Discovery of a Coal Basin on the Western borders of the Lake of the Woods; by Henry R. Schoolcraft, - - 232

XXIV. Abstract of a Meteorological Journal, for the year 1854,

Page.

kept at Marietta, Ohio; by S. P. Hildreth, M.D., - - 234

XXV. On the Composition of Eggs in the animal series; by A. Valenciennes and Frémy.—Part II. - - - - 238

XXIV. Chemical Examinations; by Ezequiel Uricoechea, - 243

XXVII. Review of the Fifth volume of the Agriculture of New York, &c., by E. Emmons, - - - - - - - 247

XXVIII. Caricography; by Prof. C. Dewey, - - - - 252

XXIX. On a remarkable change which has taken place in the composition and characters of the Water, supplied to the City of Boston from Lake Cochituate; by Augustus A. Hayes, M.D., - - - - - - - - - - 257

XXX. On Gum Mezquite; by Campbell Morfit, M.D., - 263

SCIENTIFIC INTELLIGENCE.

Chemistry and Physics.—On the elastic forces of vapors in vacuo and in gases at different temperatures, and on the tension of mixed vapors, 264—On butylic Alcohol, 269.—On the volumetric determination of Copper: On the action of iodid of amyl upon an alloy of sodium and tin, 269.—New Organic radicals containing arsenic: Action of iodid of phosphorus upon glycerine, 270.

Geology, Botany, Zoology.—Darstellung der Flora des Hainichen Ebersdorfer und des Flöhær Kohlenbassins, by H. B. Geinitz, 271.—A Monograph of the Cirripedia with figures of all the species; the Balanidæ, or sessile Cirripedes, the Verrucidæ, etc., by Charles Darwin, F.R.S., F.G.S., 272.

Astronomy.—Elements of Euphrosyne (31), 272.

Miscellaneous Intelligence.—On an Atmospheric Electrical Phenomenon, by H. Ware, 272.—On the Clearness of the Atmosphere in Oroomiah, by Rev. D. T. Stoddard, from a letter addressed to Sir John F. W. Herschel, 273.—Abstract of Meteorological Observations made at Burlington, Vt., in 1854, by Z. Thompson, 278.—Demonstration of the Theory of the Pendulum Experiment, by Rev. J. L. Dagg, 280.—On the distinction supposed to limit the Vegetable and Animal Kingdoms, by Edwin Lankester, M.D, F.R.S., 282.—Letter on the Smithsonian Institution, by Prof. Agassiz, addressed to the Hon. Charles W. Upham, 284.—On the so-called "Fountain of Blood" of Honduras, by Dr. E. D. North, 287.—On a large Diamond from the district of Bogagem, by M. Dufrénoy: Observations on the Variable Star Algol wanted, 288.—Discovery of Gold in Australia: Stereoscopes, 289.—Height of Perpetual Snow in the Alps: Hail at Cuba: Gold near Reading, Pa.: On the Mountain Systems of America, 290.—*Obituary.*—Professor Edward Forbes, 290.—Faraday's Lectures, 294.—Professor Brande's Ten Lectures on Arts connected with Organic Chemistry: Outlines of Chemical Analysis, prepared for the Chemical Laboratory at Giessen, by Prof. Heinrich Will: The Native Races of the Russian Empire, by R. G. Latham, M.D., F.R.S., &c., 295.

List of Works, 296.

NUMBER LVII.

Page.

ART. XXXI. The Vegetable Individual, in its relation to Species; by Dr. ALEXANDER BRAUN, - - - - - - - - 297

XXXII. A Research on Tellurmethyle; by F. WÖHLER and J. DEAN, - - - - - - - - - - - - 318

XXXIII. Memoir on Meteorites—A Description of five new Meteoric Irons, with some theoretical considerations on the origin of Meteorites based on their Physical and Chemical characters; by Prof. J. LAWRENCE SMITH, M.D., - - - - 322

XXXIV. On the Variable Star Algol, or β Persei; by FR. ARGELANDER, - - - - - - - - - - - 344

XXXV. Supernumerary Tooth in Mastodon giganteus; by JOHN C. WARREN, M.D., - - - - - - - - - 349

XXXVI. Supplement to the Mineralogy of J. D. Dana, by the Author.—Number I, - - - - - - - - - 353

XXXVII. Review of Murchison's Siluria, - - - - - 371

XXXVIII. Barometric Anomalies about the Andes; by Lieut. M. F. MAURY, U. S. N., - - - - - - - - 385

XXXIX. Impressions (chiefly Tracks) on Alluvial Clay, in Hadley, Mass.; by CHARLES H. HITCHCOCK, - - - - 391

XL. Emmons on American Geology, - - - - - - 397

ART. XLI. Correspondence of M. JEROME NICKLÈS—On the relations which exist between the chemical composition of bodies and their physical properties, 407.—Limits of the vaporization of Mercury, 408.—Assimilation of Nitrogen by Plants: Action of some animals fluids on the fats: Calculating Machine, 409.—Artillery in the 15th Century: Zoological Society for Acclimation and Domestication, 410.—Silkworms, 411.—Anesthesis of Bees: Pisciculture: Production of Alcohol, 412.—Photographic news: Bibliographical notices, 413, 414.—Obituary notice of Melloni, 414.—Death of M. Braconnot: Death of Joseph Remy, 415.—Monument to Arago: Correspondence of T. S. HUNT—On the Equivalent of some species: The so-called Talcose Slates of the Green Mountains: A newly discovered Meteoric Iron: Ores of Nickel from Lake Superior: 416, 417.

SCIENTIFIC INTELLIGENCE.

Chemistry and Physics.—On the specific volumes of fluid compounds, 418.—On the employment of a solution of chlorid of iron in the galvanic battery, 420.—On the law of the absorption of gases: On the mechanical equivalent of heat, 421.—A new Carbonic

Acid Apparatus, by ALFRED M. MAYER, 422.—On Bimucate of Amyl-oxyd, by SAMUEL W. JOHNSON, 423.—On Terrestrial Magnetism, by Col. SABINE, 424.—On the Stauroscope of Prof. Fr. von Kobell, 425.

Mineralogy and Geology.—Mineralogical Notes, by T. S. HUNT, 428.—Notice of a new Locality of Molybdate of Iron, by WM. J. TAYLOR: Reaction of common salt in the formation of Minerals, by M. FORCHHAMMER, 429.—Gneiss: Meteoric Iron from Greenland: On the Sandstone and Coal of North Carolina of the age of the Richmond coal basin, by Professor D. OLMSTED, 430.—Preliminary Geological Report of the U. S. Pacific Railroad Survey, under the command of Lieut. R. S. Williamson, by W. P. BLAKE, 433.—Notes on some Fossils of the so-called Taconic System described by Dr. Emmons, by JAMES HALL, 434.—Mikrogeologie; Das Erden und Felsen schaffende Wirken des unsichtbar kleinen selbstandigen Lebens auf der Erde, von C. G. EHRENBERG, 435.—Exploration of the Red River of Louisiana in the year 1852, by RANDOLPH B. MARCY, assisted by GEORGE B. M'CLELLAN, 437.—Annual Report on the Geological Survey of the State of Wisconsin, by JAMES G. PERCIVAL: First Annual Report of the Geological Survey of the State of New Jersey for the year 1854: Geological Survey of Canada, 438.

Botany and Zoology.—Dr. Hooker's Flora of New Zealand: Seeman's Botany of the Voyage of the Herald, 439.—Tulasne on the Uredineæ and Ustilagineæ: The Grasses of Wisconsin and the adjacent States, by I. A. LAPHAM, 442.—H. G. Reichenbach; De Pollinis Orchidearum Genesi ac Structura, et de Orchideis in artem ac Systema redigendis: Trigonocarpon: Analytical Class-Book of Botany, by FRANCES H. GREEN and JOSEPH W. CONGDON, 443.—On Bathygnathus borealis, an extinct Saurian of the New Red Sandstone of Prince Edwards Island, by JOSEPH LEIDY, M.D., 444.

Astronomy.—Elements of Polymnia: Elements of Amphitrite, 446.—Comet III, 1854: New Comet, 447.

Miscellaneous Intelligence.—Mascher's Stereoscope, 447.—A wonderful specimen of credulous ignorance;—Fossil man and woman, 448.—*Obituary.*—Notice of the late Frederic W. Davis of Boston, 448.—The Physical Geography of the Sea, by Lieut. M. F. MAURY, L.L.D.: Report and Charts of the Cruise of the Dolphin, by Lieut. S. P. LEE: Grammar and Dictionary of the Dacota Language, edited by Rev. S. R. RIGGS, A.M., 449.—Fresnel's Wellenfläche; Axonometrical Projections of the most important Geometrical surfaces, Drawings of Descriptive Geometry, etc., by FERDINAND ENGEL, 450.—A Catalogue of British Fossils, etc., by JOHN MORRIS, 451.—Fossils of South Carolina, by M. TUOMEY and F. S. HOLMES: Notices of recent publications, 451, 452.

List of Works, 454.

Index, 455.

ERRATA.—P. 6, 21 l. from bottom, for 1852, read 1853.—P. 160, 6 l. fr. top, for *Gouch*, read *Couch*.
